

Carmen Panepinto Zayati – Master’s student

Carmen Panepinto Zayati is a Master’s student in Bionics Engineering working on her thesis at the “Regenerative Technologies Lab” of the BioRobotics Institute of Scuola Superiore Sant’Anna. She has a bachelor’s degree in Electronics Engineering from the University of Pisa with a thesis project in collaboration with Samsung Electronics titled “Preventative Maintenance Monitoring Systems for UR3 Cobots deploying machine learning”. Currently, with her master’s thesis, she is working on the study and characterization of the response of Mesenchymal Stem cells to mechanical stimuli.
