

Pablo Carnero Olavarría – Master’s student

Pablo Carnero Olavarría is a Master’s student in Bionics Engineering working on her thesis at the “Regenerative Technologies Lab” of the BioRobotics Institute of Scuola Superiore Sant’Anna. He has a bachelor’s degree in Biomedical Engineering from the University CEU San Pablo from Madrid, Spain, with a thesis project titled “Parameterization of the assistance level of the POWER-UP exoskeleton based on workbench tests”. Currently, with his master’s thesis, he is involved in the MioPro² project for the development of a new bioink for skeletal muscle engineering.
